ABOUT

Data Analyst with 5+ years of experience across operations analytics, banking, BI reporting, pricing support, and automation. Over four years at Ergeon, I have supported operations, pricing, and market coverage teams with cost-conscious BigQuery and PostgreSQL queries, Looker Studio dashboards, Google Sheets and Apps Script automations, and AI-assisted internal tools. I focus on turning ambiguous data questions into reliable, well-documented analyses, and on building reporting workflows that stay correct as the business evolves. Most recently I have also taken on product-adjacent work, writing requirements and coordinating rollouts for pricing and market coverage updates.

EXPERIENCE

Junior Product Manager

Apr 2026 - Present

Ergeon (Freelance) · Remote

Promoted four times since 2022: Junior Data Analyst → Data Analyst → Junior Product Manager

- Continuing analytical ownership of pricing and market-coverage areas while taking on requirements, rollout planning, and stakeholder coordination for the same domains
- Translate operational, pricing, and market coverage needs into clear product requirements, validation plans, and post-release checks
- Use AI-assisted tools (Claude Code, ChatGPT) with prompts and workflows version-controlled in GitHub to accelerate analysis, documentation, and QA

Data / Business Analyst

Jan 2022 - Mar 2026

Ergeon (Freelance) · Remote

- Wrote cost-conscious analytical SQL in BigQuery and PostgreSQL across large operational datasets, optimising joins, filters, partition pruning, and extraction logic to keep query cost and runtime predictable
- Built and owned Looker Studio dashboards covering operational KPIs, backlog, order status, blockers, and performance trends, with explicit grain, definitions, and dashboard-level QA checks
- Supported operations, pricing, and market coverage teams with ad-hoc analysis across leads, quotes, orders, revenue, installers, contractors, and material/catalog data
- Investigated data and product-logic issues, distinguishing genuine bugs from definitional mismatches and feeding fixes back into source queries and downstream reports
- Built Google Sheets and Apps Script automations to replace manual reporting steps and improve team workflows
- Created and audited reporting logic, QA workflows, and internal analytical tools using SQL, Python, Airflow, Streamlit, and AI coding assistants
- Used Claude Code and ChatGPT, with version-controlled prompts and workflows in GitHub, to accelerate analysis, documentation, and internal tool development

Banking Officer

Jul 2020 - Jan 2022

Alpha Bank

Private Banking Division (last 5 months)

- Reviewed and validated high-value transactions for private banking clients
- Enhanced Excel-based transaction validation workflows using Power Query

Credit Management Division, Mortgage Loans

- Evaluated COVID-19 interest subsidy applications for SMEs, securing continued interest revenue for the bank
- Accelerated mortgage processing by coordinating between law offices and bank branches, reviewing documentation and resolving issues
- Built Excel-based productivity tracking tools to monitor team performance on mortgage case handling and completion rates

Data Analyst Intern

Nov 2019 - Mar 2020

Eurobank · Global Corporate & Investment Banking

- Developed and maintained P&L reports and budget tracking for department leadership using Excel and pivot tables
- Built data preparation and visualization workflows in R to determine optimal interest rates for corporate clients based on risk profiles

EDUCATION

Master in Applied Statistics

2018 - 2021

University of Piraeus

Grade: 8.33/10 · Thesis: Analyzed correlations between Bitcoin and market indices including crude oil, gold, and USD

Bachelor in Economics

2010 - 2016

National and Kapodistrian University of Athens

CERTIFICATIONS

Python for Data Science — Aegean University

Computer Literacy — University of Athens

Excel Power Query — Udemy

SKILLS

Data & SQL
