

Jon Zisi

Junior Product Manager | Data, BI & Automation Background

Turning operational data into clear product decisions

✉ zisi.jon@yahoo.com | LinkedIn | GitHub | Athens, Greece

ABOUT

Junior Product Manager with a strong Data / Business Analyst background and 5+ years of experience across operations analytics, banking, BI reporting, pricing support, and automation. After more than four years supporting Ergeon's operations, pricing, and market coverage teams through SQL analysis, Looker Studio dashboards, BigQuery and PostgreSQL workflows, Google Sheets automations, and AI-assisted internal tools, I transitioned into Product Management in April 2026. I focus on translating operational complexity into clear requirements, better workflows, and data-informed product decisions.

EXPERIENCE

Junior Product Manager

Apr 2026 - Present

Ergeon (Freelance) · Remote

Promoted four times since 2022: Junior Data Analyst → Data Analyst → Junior Product Manager

- Translate operational, pricing, and market coverage needs into clear product requirements, user stories, and implementation plans
- Write requirements for engineering and systems teams, and coordinate delivery with operations and pricing stakeholders
- Support product decisions with analysis across leads, quotes, orders, revenue, installers, and material/catalog data
- Coordinate rollout planning, stakeholder communication, validation, and post-release checks for pricing, catalog, and market coverage updates
- Use AI-assisted tools such as Claude Code and ChatGPT to accelerate product research, QA, documentation, and implementation planning

Data / Business Analyst

Jan 2022 - Mar 2026

Ergeon (Freelance) · Remote

- Supported operations, pricing, and market coverage teams with ad-hoc analysis across leads, quotes, orders, revenue, installers, contractors, and material/catalog data
- Built and maintained Looker Studio dashboards to monitor operational KPIs, backlog, order status, blockers, and performance trends
- Wrote cost-conscious analytical queries in BigQuery and PostgreSQL, optimising joins, filters, and extraction logic for large datasets
- Investigated data and product-logic issues, distinguishing genuine bugs from definitional mismatches and feeding fixes back into source queries and downstream reports
- Developed Google Sheets and Apps Script automations to reduce manual reporting and improve team workflows
- Created and audited reporting logic, QA workflows, and internal analytical tools using SQL, Python, Airflow, and AI coding assistants
- Used AI tools such as Claude Code and ChatGPT to accelerate analysis, documentation, QA, and internal tool development

Banking Officer

Jul 2020 - Jan 2022

Alpha Bank

Private Banking Division (last 5 months)

- Reviewed and validated high-value transactions for private banking clients
- Enhanced Excel-based transaction validation workflows using Power Query

Credit Management Division, Mortgage Loans

- Evaluated COVID-19 interest subsidy applications for SMEs, securing continued interest revenue for the bank
- Accelerated mortgage processing by coordinating between law offices and bank branches, reviewing documentation and resolving issues
- Built Excel-based productivity tracking tools to monitor team performance on mortgage case handling and completion rates

Data Analyst Intern

Nov 2019 - Mar 2020

Eurobank · Global Corporate & Investment Banking

- Developed and maintained P&L reports and budget tracking for department leadership using Excel and pivot tables
- Built data preparation and visualization workflows in R to determine optimal interest rates for corporate clients based on risk profiles

SELECTED PROJECTS

Product & Pricing Workflow Improvements

Ergeon · Product Operations, Pricing, SQL

- Supported improvements to pricing and operational workflows by combining stakeholder input, SQL analysis, and process documentation
- Helped identify inconsistencies in pricing, material/catalog logic, and operational data flows

Operations & Backlog Dashboards

Ergeon · Looker Studio, BigQuery, PostgreSQL

- Built dashboards to monitor backlog, active projects, blockers, order status, market coverage, and operational performance
- Created QA workflows to compare dashboard values against source data and improve reporting reliability

Material Catalog & Pricing Analysis

Ergeon · SQL, Catalog Data, Pricing Logic

- Audited material catalog structures, product categories, vendor SKU mappings, and pricing-related logic
- Helped identify inconsistencies in material classification, ZIP assignment, and catalog standardization workflows

AI-Assisted Internal Tooling

Personal / Work Productivity · Claude Code, GitHub, Python

- Built and experimented with AI-assisted workflows for code review, dashboard migration, documentation, and productivity systems
- Used GitHub-based workflows to manage prompts, implementation plans, QA notes, and reusable automation patterns

EDUCATION

Master in Applied Statistics

2018 - 2021

University of Piraeus

Grade: 8.33/10 · Thesis: Analyzed correlations between Bitcoin and market indices including crude oil, gold, and USD

Bachelor in Economics

2010 - 2016

National and Kapodistrian University of Athens

CERTIFICATIONS

- Python for Data Science — Aegean University
- Computer Literacy — University of Athens
- Excel Power Query — Udemy

SKILLS

Product & Operations

- Product Requirements
- Workflow Mapping
- Stakeholder Alignment
- Process Improvement
- Product QA

BI & Reporting

- Looker Studio
- Google Sheets
- Excel
- Dashboard QA
- KPI Reporting

AI-Assisted Workflows

- Claude Code
- ChatGPT
- Prompt Engineering
- GitHub Workflows
- Documentation Automation

Data & SQL

- Big Query
- PostgreSQL
- Analytical SQL
- Query Optimisation
- Data Quality Checks

Automation & Data Tools

- Python
- Google Colab
- Apps Script
- Airflow
- Streamlit

Business Domains

- Operations Analytics
- Pricing Analysis
- Revenue Analysis
- Material Catalog Analysis
- Market Coverage Analysis
- Product Operations

LANGUAGES

- Greek (Native)
- English (Professional)
- Albanian (Basic)
